

## CENTRAL LOCKING SYSTEM

- Several drawers can be locked with "PLUR", the electronic lock for central locking systems.
- Whether with RFID cards or via Bluetooth, "Plur" is fixed inside, is not visible from the outside and allows a continuous design without interruption of the furniture surface.
- The integrated battery allows flexible mobility as no power connection is required. The battery status is displayed in the app or checked whenever a RFID key is used.
- Depending on the application and frequency, a battery can create up to 15,000 openings or work for 7 years.

### Features Bluetooth:

With the app, multiple locks can be grouped together, and then opened at the same time. For example, you can open all the furniture in the office at the same time and lock it again in the evening. The battery status is displayed in the app.

### Features RFID:

The lock does not automatically close, but requires the RFID card to lock again. This ensures that you do not leave the card in the drawer. The battery is checked at every opening and in case of a weak battery an alarm is heard and the lock is no longer locked.

### Blum CABLOXX:

The supplied CABLOXX adapter plate allows easy installation with the Blum Cabloxx locking system.

Article number:	PLUR
Customs tariff number:	83013000
Order quantity:	100

### Technologies and Ranges:

- RFID 125 kHz (EM4102 / EM4200)  
up to 30 mm with RFID key cards  
up to 20 mm with RFID key chips
- RFID 13.56 MHz (Mifare)  
up to 20 mm with RFID key cards  
up to 10 mm with Mifare debit and credit cards  
up to 15 mm with RFID key chips
- Bluetooth

## INSTALLATION

### Fixing the adapter plate

### Fix the lock

### Adjust the altitude and fix the unit
