

A LOCK WITH AN ADJUSTABLE RFID ANTENNA

A handy solution as an alternative to deposit locks and mechanical lock cylinders in the public area.

The lock can be applied with key cards, chips and RFID wristbands.

Due to an efficient fitting of the lock, it can be easily placed into the previous position of a deposit lock or into an already existing punching of a cylinder.

Thanks to battery operation there is no need to wire. Thus, the assembling is very flexible.

The 1.5 Volt lithium battery has a life-span of 10 years with the 125 kHz. The battery has enough power to open the lock more than 20,000 times. When the battery starts to run out, the lock will no longer lock and a continuous tone will sound for 15 seconds, at this point change the battery.

Technology:	RFID 125 kHz (EM4102/ EM4200)
Article number:	GYM-125
Customs tariff number:	83013000
Order quantity:	100
