

GYM

A LOCK WITH MIFARE AND BLUETOOTH TECHNOLOGY

A handy solution as an alternative to deposit locks and mechanical lock cylinders in the public area, for example for lockers in Gym's and swimming pools.

Due to an efficient fitting of the lock, it can be easily placed into the previous position of a deposit lock or into an already existing punching of a cylinder.

The 1.5 Volt lithium battery has a life-span of 3 years with the 13.56 MHz technology and 1 year with the DUAL-lock. The battery has enough power to open the lock around 20,000 times. When the battery starts to run out, the lock will no longer lock and a continuous tone will sound for 15 seconds, at this point change the battery.

GYM – 13

Lock with RFID 13.56 MHz: all Mifare chips

Article number:	GYM-13
Customs tariff number:	83013000
Order quantity:	100

GYM – DUAL (SOON AVAILABLE)

Dual is a combination lock of the following technologies:

- Bluetooth
- RFID 13.56 MHz: all Mifare chips

Article number:	GYM-DUAL
