

GYM

A LOCK WITH MIFARE TECHNOLOGY

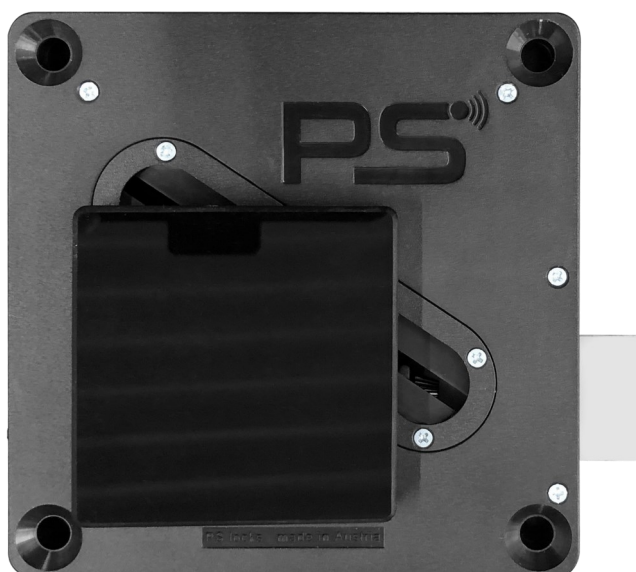

A handy solution as an alternative to deposit locks and mechanical lock cylinders in the public area, for example for lockers in gym's and swimming pools.

Due to an efficient fitting of the lock, it can be easily placed into the previous position of a deposit lock or into an already existing punching of a cylinder.

The 1,5-volt lithium batteries have a life-span of 10 years with the 13,56 MHz technology. They have enough power to open the lock more than 20,000 times. When the batteries start to run out, the lock will no longer lock and a continuous tone will sound for 15 seconds. At this point, change the batteries.

Features:

- Flexible with the positioning
- Free choice of cabinet or access control for up to 49 RFID keys
- Mifare ISO 14443A RFID technology
- Range of temperature: 5-35°C

GYM – 13

Lock with RFID 13.56 MHz: all Mifare chips

Article number:	GYM-13
Customs tariff number:	83013000
