

STRIKER

DOOR ACCESS UNIT

Give your home, your office or other doors a RFID access control. With the STRIKER you can control any external 12V DC unit. The internal relay has a maximum load of 5A. Connect the 12V DC power supply as well as the electronic door striker to the connectors at the top of the unit.

The STRIKER includes:

- Electronic control unit
- External antenna with 1,5m cable
- Distance plate

Not included:

- electronic door striker
- 12V DC power supply
