

UPDATE: GYM

The GYM Update enables a free choice of locker for SOLO 125+ and SOLO 13+ locks.

With the GYM Update, any free locker can be occupied with any RFID key (card/chip). Only the key used for closing or the programming card, which serves as a master, can open the lock again. After opening, the locker can be occupied by any RFID key.

Features

- Ideal for use in public areas, gyms or employee lockers.
- The GYM update is only compatible with SOLO 125+/SOLO 13+ locks.
- The locker cannot be occupied until the door is closed and an RFID key is presented.
- Several lockers can also be occupied with one RFID key.
- When not installed, the lock can be tested with the locking part inserted.

The GYM update can either be installed on SOLO 125+/SOLO 13+ locks with the UPDATECARD GYM ON or the locks can be ordered in advance with the update installed.

UPDATECARD GYM / ACTIVATION

GYM update by means of UPDATECARD 13 GYM ON SOLO 13+:

- 1. briefly press the button on the back of the lock.
- 2. during the short successive beeps, the UPDATECARD GYM ON must now be held to the lock
- 3. now the GYM Update is activated and the locker can be occupied with any key as soon as the door is closed.
